

CERTIFICATE

Deutsche Zertifizierungsstelle Öko-Tex
der Internationalen Gemeinschaft für Forschung
und Prüfung auf dem Gebiet der Textilökologie
Frankfurter Straße 10-14 65760 Eschborn

The company

Amann & Söhne GmbH & Co. KG

Hauptstraße 1

74357 Bönningheim

is granted authorization according to Oeko-Tex Standard 100 to use the Oeko-Tex mark, based on our **test report 07.0.52698**

for the following articles:

ONYX and STRONGFIL, sewing thread made of 100% polyamide white and coloured; **SERABRAID**, braising yarn made of 100% polyester, white and coloured; **PA-bulky yarn SGD**, sewing thread made of 100% polyamide in raw white;

TRANSFIL, mono filament made of 100% Polyamide in raw white and smoke grey;

ISAMET, metallic core thread made of 45% polyamide core and 55% coloured;

META, metallic core thread made of 65% polyamide core and 35% coloured;

I-Tech, multifilament thread made of polyamide/polyester-inox, 80/20, raw white; **N-TECH and NC-TECH**, sewing thread made of 100% Meta-aramide in raw white and coloured; **K-TECH and KC-TECH**, sewing thread, made of 100% Para-aramide non dyed,

produced in use of Oeko-Tex certified materials.

The results of the inspection made according to Oeko-Tex Standard 100, **product class II** have shown that the above mentioned goods meet the human-ecological requirements of the standard presently established for products with direct contact to skin.

The certified articles fulfil the requirements of the existing European legislation regarding the use of azo-dyes.

The holder of the certificate, who has issued a conformity declaration according to EN ISO 17050-1, is under an obligation to use the Oeko-Tex mark only in conjunction with products that conform with the sample initially tested.

This authorisation is valid until 31.08.2008
